

Tanishak Mohan Katiyar

AI and Machine Learning enthusiast and Python programmer

Noida, Uttar Pradesh, India | mohantanishak@gmail.com | 6391297492 | [LinkedIn](#)

AI & Machine Learning enthusiast and Python developer who builds end-to-end deep learning and generative AI solutions — including a multi-architecture brain tumor MRI classifier with an interactive Streamlit inference dashboard, a healthcare recommender system, and a voice-activated IoT assistant. Skilled in PyTorch, scikit-learn, Pandas, SQL and modern frontend tools; completed 10+ hours of certified AI upskilling focused on generative AI and prompt engineering.

Profile

AI and Machine Learning enthusiast and Python programmer with hands-on experience building deep learning classification models, generative AI solutions, and hardware-software integrations. Built multi-architecture brain tumor classification models, a healthcare recommender system, and IoT automation tools. Completed 10+ hours of certified AI upskilling through LinkedIn Learning and Microsoft.

Technical Skills

- | | | | |
|---------------------|--------------------|---------------------------|--------|
| • Python | • SQL | • HTML5 | • CSS3 |
| • JavaScript (ES6+) | • Machine Learning | • Artificial Intelligence | |

Projects

Brain Tumor MRI Classification Dashboard

2026

- Deep Learning Project Python, PyTorch, Streamlit, Torchvision
- Repurposed 6 segmentation encoder architectures (U-Net, U-Net++, Hybrid U-Net, ResU-Net, SegNet, DeepLabV3) for 4-class MRI classification by replacing decoders with pooling and dense classification heads.
- Built an interactive Streamlit dashboard to upload scans, compare model predictions, and view real-time probability distributions across glioma, meningioma, pituitary, and no-tumor classes.

Healthcare Recommender System

2024

Machine Learning Project Python, Scikit-learn, Pandas – Built a predictive ML system suggesting personalized healthcare paths based on symptom analysis, using Random Forest and Logistic Regression for disease classification.

J.A.R.V.I.S. - Hardware Controlling AI

2024

Personal AI Automation Project Python, Speech Recognition, IoT – Engineered a voice-activated AI assistant that controls local hardware and automates smart home tasks via NLP-based command interpretation.

Personal Portfolio Website

2023

Frontend Development Project HTML, CSS, JavaScript, GitHub Pages – Designed a responsive, SEO-optimized personal brand website showcasing technical projects and GitHub contributions.

Education

Galgotias College of Engineering and Technology, Greater Noida

Bachelor of Technology in Computer Engineering, Oct 2024

Certifications
